

VUEAV

HOME CINEMA

ENABLING THE HOME CINEMA EXPERIENCE

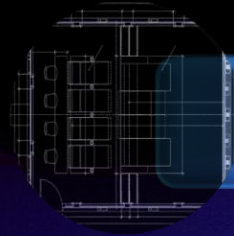

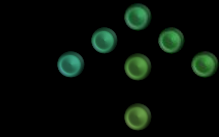

Our design team consults with you to share our expertise on how to achieve and best fit within your budget and visual intent.

During the consultation, we consider:

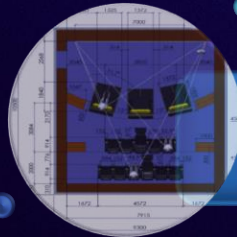

DESIGN

You bring the vision, we make the magic. Modern, transitional, or a turn-of-the-century theatre.

LIGHTING

Playing an essential role in your visual design, we offer wall sconces, LED accents, and ceiling designs for an immersive experience.

SEATING

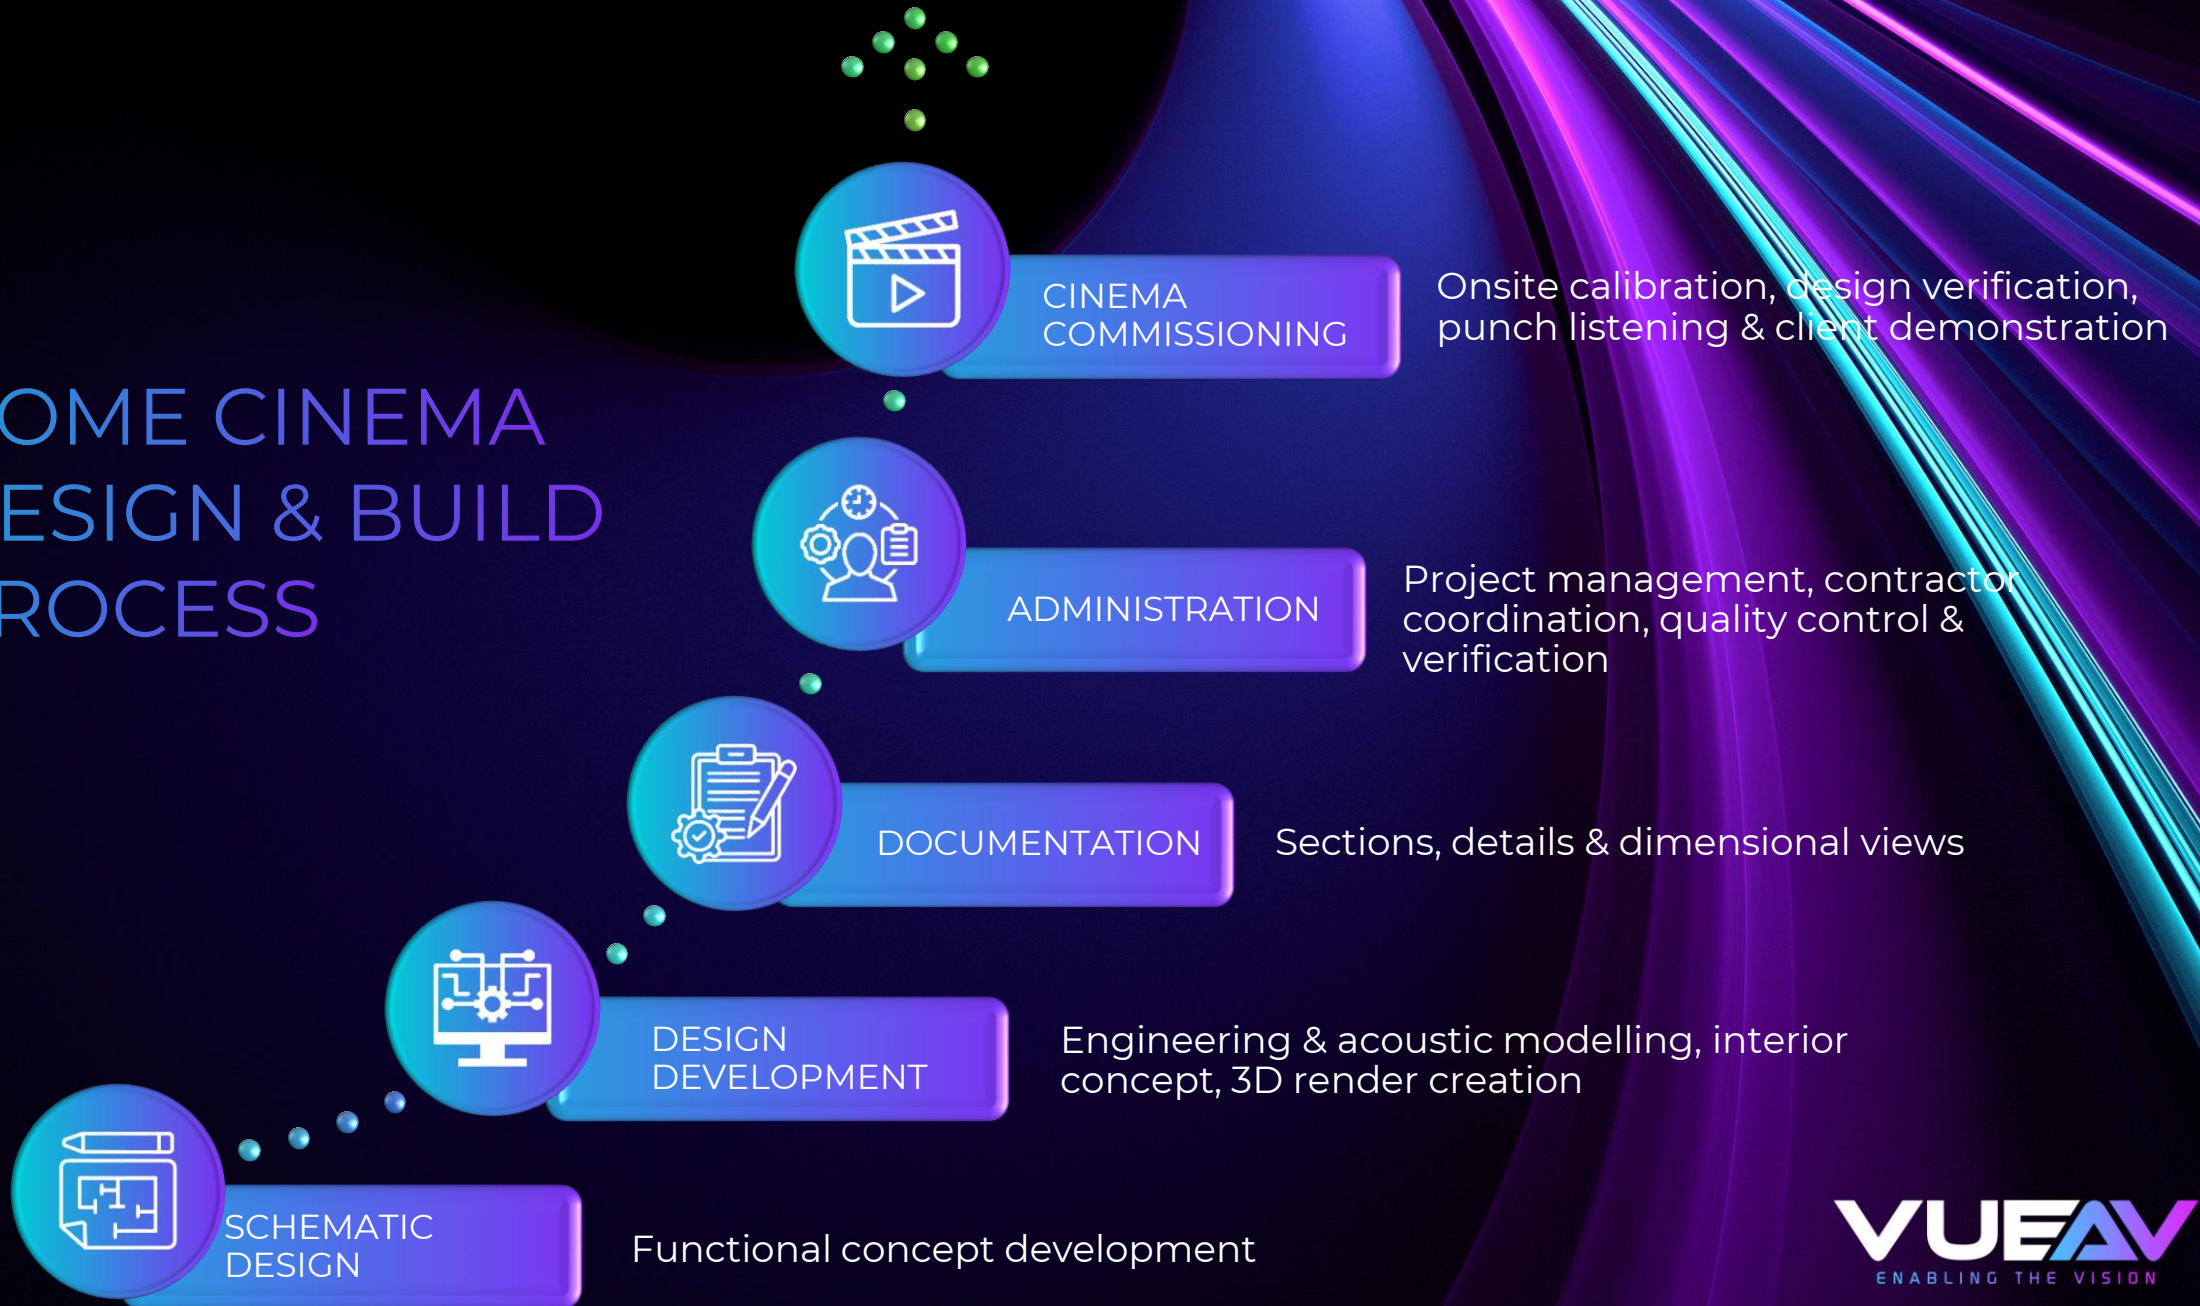

We ensure optimal viewing conditions with proper sight lines, angles, riser depths, height, and walkway placement.

ACOUSTIC PERFORMANCE

We recommend ARS placement to optimise the sound system, designed to integrate seamlessly without affecting your space's aesthetics.
